

**Across**

- 5 Palmar interosseous muscles ..... the fingers (6)
- 8 Abductor digiti minimi originates from which ligament? (10)
- 10 ..... arteries are the immediate branches of the palmar arch to the digits (6,7)
- 11 The ulna artery gives rise to this arch in the hand (11,6,4)
- 12 The only movement in the body specific to the thumb (10)
- 14 Flexor digiti minimi originates from the ..... Of hamate (4)
- 15 Inserts into the skin on the little finger (8,6)
- 17 Thenar muscles are innervated by the ..... Branch of the median nerve (9)
- 18 originates from the tendons of the flexor digitorum profundus (9)
- 2 All muscles of the thenar eminence are inserted into the base of the proximal phalanx except the ..... (8,8)
- 3 The largest and deepest of the thenar muscles (8,8)
- 4 Nerve which supplies the palmar skin of the lateral three and a half digits of the hand (6)
- 6 The deep branch of ulnar nerve, ..... and radial artery pass through the two heads of the adductor pollicis. (8,4)
- 7 Extensor hood is ..... in shape (10)
- 9 Abducts the thumb at metacarpophalangeal joint (8,8,6)
- 13 the deep palmar arch is from the ..... artery (6)
- 16 The medial two lumbricals are ..... (9)

**Down**

- 1 Formed by the expansion of the tendons of the extensor digitorum on the dorsal aspect of the proximal phalanges of the fingers
